Instructions

^ COLLAPSE ^

Preliminary Setup:

1. Go to [w3schools.com](https://www.w3schools.com)
2. Create an account (preferably with your college account)
3. Visit my-learning.w3schools.com/tutorial/git
4. Complete the following readings:
 1. Essentials 1.1, 1.2, 1.3
 2. Essential Commands 2.1, 2.2, 2.3, 2.4
 3. Branch Management 3.1, 3.2
 4. Remote Collaboration 4.1-4.9
 5. Security Practices 6.1-6.3
 6. Attempt the Git Quiz (aim for $\leq 70\%$)
5. Verify you're in the main branch via ``git status`` or ``git branch``
6. If not, ``git checkout main``
7. Create a branch for this assignment ``git checkout -b M1-Git-Readings``
8. **Note:** In this assignment, we'll make the pull request later. In future assignments, we'll likely open it earlier so we can use the URL for assignments
9. Fill in the items in the worksheet below (save as often as necessary)
10. Once finished, export the worksheet
11. Take the exported file and add it anywhere in your repository (a Module1 folder is best, but not required)
12. Make sure git detects it by checking with ``git status``
13. If everything is good, continue to submit
 1. Track the file either with ``git add path/to/file`` or ``git add .``
 2. Commit changes via ``git commit -m "some relevant message"``

3. Push the changes via `git push origin M1-Git-Readings`

14. Go to GitHub and use the dropdown in the top left to find the M1-Git-Readings branch and ensure the file is present
15. If the file is there, either use the pull request popup or go to the pull request tab and open a request where main is base and M1-Git-Readings is compare
16. Open and complete the merge of the pull request (it should turn purple)
17. Go to Canvas and upload the same PDF that you just downloaded and pushed to GitHub

Branch name: M1-Git-Readings

Group: Github Readings
Task #2: Reflection
Sub Task #1: Mentions issues or no issues

Sub-Task

Group: Github Readings
Task #2: Reflection
Sub Task #2: Summarize core concepts related to the readings

Task Response Prompt

Explain in concise steps how this logically works

Response:

There were no issues with completing the assignment in terms of using the website. Making an account was easy as I used my NJIT Google account to sign in. From there I was able to access all of the modules, read them and took the quiz.

Task Response Prompt

Explain in concise steps how this logically works

Response:

The text talked about Git, which is a version control system. It uses various GitBash/Linux commands to function. Data is stored in a repository which consists of multiple branches. Branches protect data from being overwritten (helpful in group settings). Each edit is sent to the repo with a commit statement that acts as a timestamp and is then pushed to the repo. This helps users to track their work and provide proof of the edits they made. In order to sync from the repo back to the local machine, a pull command is used. For better security, you can get up an SSH asymmetric key with Git.
